Poultry  
Domestic animals**

product	use	article-No.	package
penergetic-t	large animals	at 100302	2 kg
penergetic-t	small animals	at 100305	120 g

**Carrier material:**  
Calcium-Carbonate

## Application

Animal species	Dosage
cattle	1-2 g per day for live stock unit (1 Cow = 1 LSU)
pigs	20 g per ton with wet fodder or 50 g per ton dry fodder
poultry	20-50 g per ton fodder
horses	3-5 g per day
sheep	1 g per day and live stock unit (1 adult sheep is 0,1 LSU)
small animals	1-3 g per week

### Slow increasing dosage

Penergetic-t can be mixed with the fodder and into the drinking water. The dosage should be given in slowly increasing dosages up to the recommended quantity.

Example: Start with half of the indicated dosage and increase the amount of Penergetic-t slowly in the next 2 weeks to the recommended dosage. E.g. 60 cattle: 30 g Penergetic-t increasing slowly up to 60 g.

### Application in case Penergetic-t cannot be mixed into the fodder

Mix Penergetic-t in the recommended amount with water in a watering can. Before use, stir it again and spray the mix over the fodder or ensilage.

Approved under EU Regulation 'Ecological Cultivation' 2092/91/EWG
