

penergetic[®] W

**Surface water -
naturally clear**

**ponds
small lakes
garden ponds**

Product	use	No.	Package
penergetic-w	surface water	wa 540102	2 kg
penergetic-w	surface water	wa 540105	120 g

Carrier Material:
Quartz meal

Effect

reduces algae's • stabilises the ecological balance

Application

penergetic-w is used preferably from spring to autumn. For the first application use 5 g/m² and after that 1 g/m².

For the first month treat the water once every week and after that every 3 to 4 weeks. Mix the recommended dosage in a lot of water and spill it over the surface (with a watering can for example).

Recommendations:

After heavy rains the dosage must be increased by 1 g/m².
If temperatures are high, the intervals of application must be increased.
If there is an intense algae growth, spill it directly over the algae's

Other products:

penergetic-g: for an optimal treatment of slurry and liquid manure.
penergetic-k: for more fertile soils and better climate in stables.
penergetic-t: feed additive for healthier animals.
penergetic-p: for more productive, resistant and stronger plants.
